PROFESSIONAL SUMMARY

Full-Stack Web Developer and Computer Science Engineering student with hands-on experience in modern web technologies, cybersecurity fundamentals, and building production-ready applications. Passionate about creating secure, scalable web solutions and exploring browser-level security analysis.

EDUCATION

Muthoot Institute of Technology & Science (MITS) <i>B.Tech in Computer Science & Engineering — Cybersecurity</i>	Kochi, Kerala 2024 – 2028
Bethany St. John's Higher Secondary School <i>Higher Secondary Education — State Syllabus</i>	Kunnamkulam, Kerala 2022 – 2024
Holy Cross CBSE School <i>Secondary Education — CBSE</i>	Kunnamkulam, Kerala Completed 2022

EXPERIENCE

Cybersecurity Intern <i>John and Smith Solutions Pvt. Ltd.</i>	Jun 2026 Thrissur, Kerala
- Completed an intensive internship focused on cybersecurity concepts and software development practices. - Contributed effectively to assigned projects, demonstrating strong understanding of engineering concepts. - Gained practical exposure to security workflows, threat analysis, and secure development methodologies.	

TECHNICAL PROJECTS

Secure Sight — <i>Chrome Extension for Real-Time SSL/TLS Certificate Analysis</i>	
- Developed a Chrome extension (Manifest V3) that performs real-time SSL/TLS certificate analysis on visited websites. - Built a Node.js + Express backend that performs TLS handshakes and evaluates certificate validity, encryption strength, and hostname matching. - Classifies websites as Secure, Warning, or Insecure with an intuitive color-coded browser interface.	
FlavorNext — <i>Company Website (Next.js)</i>	
- Designed and developed a professional business website for FlavorNext using Next.js framework. - Implemented responsive UI components, optimized performance, and ensured cross-browser compatibility.	
GitCloud — <i>Cloud Storage Integration Platform</i>	
- Developed a cloud storage integration platform that automates repository backup, synchronization, and deployment workflows. - Built using Node.js and Git CLI with cloud API integrations for distributed development environments.	
247 — <i>Screen Mirroring Application</i>	
- Engineered a discreet, low-resource screen mirroring application for seamless real-time remote monitoring. - Implemented using Python with socket programming and screen capture libraries for background operation.	
Hand Mouse Tracker — <i>Gesture-Based Cursor Control</i>	
- Developed a system to control the cursor using hand gestures, leveraging Python, OpenCV, and MediaPipe. - Implemented real-time hand landmark detection and gesture recognition for touchless computer interaction.	
Vehicle Management System — <i>Database-Driven Record Management</i>	
- Built a system to store and manage vehicle records using Python and MySQL with full CRUD operations. - Designed an efficient database schema for tracking vehicle data and managing records seamlessly.	

TECHNICAL SKILLS

Programming: Python, C, JavaScript, HTML, CSS, SQL
Frameworks & Development: React, Next.js, Node.js, Express.js, Django, REST APIs, Full-Stack Web Development
Libraries & Tools: OpenCV, MediaPipe, Socket Programming, Chrome Extensions (Manifest V3)
Infrastructure & Systems: Linux, Git, Docker, MySQL, SQLite, VS Code, Networking Fundamentals
