## SUMMARY

Driven 2nd year B.Tech Computer Science and Cyber Security student with solid fundamentals in C, Python, networking, and web development. Experienced in academic projects and network simulations, with a growing interest in cybersecurity and real-world problem solving. Known for adaptability, fast learning, and collaborative teamwork. Actively seeking an internship (including unpaid opportunities) to gain hands-on experience, contribute to projects, and build industry-relevant skills.

## EXPERIENCE

MUTHOOT INSTITUTE OF TECHNOLOGY AND SCIENCE  
*B.Tech Computer Science and Cyber Security Student*  
Sep 2024 - Present | Ernakulam, India

- Gained hands-on experience in C, Python, and computer networking fundamentals
- Built and tested network topologies using Cisco Packet Tracer
- Developed basic web applications using HTML and CSS
- Designed a Student Database Management System (DBMS) using SQL with operations like INSERT, UPDATE, DELETE, and JOIN queries
- Applied database concepts such as normalization and data integrity in real-world scenarios
- Worked on Computer Organization (COA) concepts, including instruction cycle, CPU architecture, and memory operations
- Participated in team-based academic projects, improving problem-solving and collaboration skills

## PROJECTS

### *Hand Mouse Tracker*

- *Developed a system to control cursor using hand gestures using Python*

### *Parking Management System*

- *Designed a system to manage parking slots, vehicle entry and exit*

### *Vehicle Management System*

- *Built a system to store and manage vehicle records using database operations*

### *Secure Sight (Browser Security Project)*

- *Developed a tool to check website security (HTTPS, certificate validity, etc.)*

## *GitCloud*

- *Developed a cloud storage integration platform that automates repository backup, synchronization, and deployment workflows for distributed development environments.*

247

- *Engineered a discreet, low-resource screen mirroring application for seamless, real-time remote monitoring and background operation.*

## **SKILLS**

- **Programming:** C, Python
- **Web Development:** HTML, CSS (Basic), JavaScript (Basic)
- **Tools & Technologies:** Git, GitHub, Cisco Packet Tracer, Node.js (Basic)
- **Core Concepts:** Computer Networking, DBMS, Computer Organization
- **Soft Skills:** Problem-solving, Teamwork
